PERSONAL *I am married to a wonderful person named Dicksy. We have two wonderful children named Drake and Rosey. Our family is mostly in York County. My wife and I grew up here and were away for about 10 years. We came back and built our home here. I started my business as a writing business and have evolved it into a web marketing firm (RevenFlo). I have become very involved over the years in community development, especially in Rock Hill. I have written and spoken on the topic many times and continue to do so. Music is a big part of my life. I play music at work and at home. I have been in bands most of my life, but have gone large breaks between them as an adult. I have always written creatively as well. My degrees are in creative writing. I am always working on a book (at different paces at different times). I love to create things that have a positive effect.*
